

STAND FOR HEALTH FREEDOM

May 2023 Update - Work continues behind the scenes as dedicated watchdogs Dr. Henry Ealy, Senator Dennis Linthicum, and Senator Kim Thatcher, along with others, seek to launch a grand jury investigation into the conduct of the CDC during the COVID crisis. **The defendants are still pushing back.**

Here's a timeline of highlights that got us to this point:

- **March 2020:** Dr. Henry Ealy began daily tracking of data on COVID cases, hospitalizations, and fatalities, both in the U.S. and abroad.
- **March 2020:** The CDC began modifying the recording of death certificates exclusively for COVID fatalities without submitting notices to the Federal Register for public accountability. In doing so, the CDC allegedly violated at least three federal laws and enabled fraudulent hyperinflation of COVID data which was then used to justify school and business closures, masking, and emergency approval of COVID shots.
- **March 2020:** The Department of Health and Human Services (HHS) financially incentivized COVID diagnosis, and treatments that many people believe lead to bad outcomes and even death that could have been avoided if other treatment options remained available and financed. Senator Dr. Scott Jensen exposed malfeasance with ventilator Medicare/Medicaid insurance reimbursements, and Medicare/Medicaid insurance fraud misappropriated at least \$3.5 trillion of U.S. taxpayer funds.
- **April 2020:** COVID numbers were falsely inflated on all fronts. Dr. Deborah Birx stated at a White House press briefing, "...the intent is right now that those if someone dies with COVID-19 we are counting that as a COVID-19 death." (Emphasis added.)
- **October 2020:** A COVID research team led by Dr. Ealy published a peer-reviewed manuscript alleging criminal data fraud by the CDC. Their research indicated "that COVID death certificates were fraudulently hyperinflated by 88.6% to 94.0% as a result of the CDC breaking three federal laws."
- **October 2020:** Ealy notified the Department of Justice (DOJ) and all U.S. attorneys of the CDC's violations of federal law, requesting a grand jury investigation into criminal data fraud and willful misconduct. There were no responses.
- **February 2021:** Ealy and Stand for Health Freedom co-produced "Data Disaster: A Call for an Investigation into the CDC's Conduct During COVID-19" to shine a light on these allegations. Scroll down to the bottom of this page to watch the replay of that event.

- **March 2021:** SHF posted a petition to gather signatures requesting a grand jury investigation into the CDC's conduct during the COVID crisis.
- **March 2022:** Ealy, Thatcher, and Linthicum filed a 63-page grand jury petition in Ninth Circuit Federal Court with over 1000 pages of exhibits to substantiate allegations of criminal data fraud and willful misconduct.
- **April 2022:** The CDC launched an internal investigation into its own performance during the COVID crisis.
- **August 2022:** The CDC concluded its internal investigation with Director Rochelle Walensky addressing CDC staff in an internal video. In what appears to be “an attempt to claim gross incompetence as a defense against criminal fraud and willful misconduct allegations, Walensky reported that the CDC ... “will be dramatically restructuring all aspects of its operations based upon report recommendations.” In the video, Walensky also said, “To be frank, we are responsible for some pretty dramatic, pretty public mistakes — from testing, to data, to communications.”
- **August 27, 2022:** Attorneys for the defendants submitted a motion to dismiss the grand jury petition. Dr. Ealy shared, “They assert that the reason for their late filing, after having been granted 120 days in total to file a response, was because their dog was sick.”
- **September 2022:** SHF's Leah Wilson interviewed Ealy, Thatcher, and Linthicum to check in on the petition's process. Watch the video of that conversation on this page.
- **November 11, 2022:** The court granted the defendants' motion to dismiss the grand jury petition.
- **February 16, 2023:** The petitioners filed an appeal to request that the grand jury petition be reconsidered.
- **May 19, 2023:** After 2 extensions of time, the government finally responded to the appeal, claiming there is no standing to bring a case: in other words, the federal government is saying the senators and Dr. H do not have a legal legs to stand on to sue for a grand jury investigation. The petitioners have the right to reply to the government brief, and then the court will decide whether the case can move forward. It is possible we could have another update by the fall.

And so, the fight continues. Stay tuned to this page and our emails. We'll update you on the latest news and call on you to take action, if needed.
